

Pray for us, too, that God may open a door to us for the word, to speak of the mystery of Christ (Colossians 4:3)

This summer we will begin and complete construction of our long awaited lift project to improve access to the main entrance to the church.

Although not pictured, the construction will include 2 new handicap parking spaces next to the ramp

The cost of design and construction the lift is projected at \$280,000 (\$300,000 if there are unforeseen complications in construction). The good news is that we have 2/3rds of the money we need. With your help and your hard earned dollars, we can accomplish our goal of raising an additional \$100,000. Any extra funds raised will go to improving the lighting in the church.

Please make an offering this Easter Season to help us pay for the lift. Designate your offering by a memo on your check or envelope for the Building Fund. Or you can make an online donation to the building fund using Connect Now.

As you enter the Arctic Entry, you will have the option of coming up the steps to the church as normal, utilizing a chair lift to go up to the church or down to the basement by the restrooms, or using redesigned steps to go to the basement.

The lift will replace the Book Nook. The steps to the second floor offices will be altered as well and heat will be provided to the office midway up the steps.

Peace,
Fr Ross
